INDEX

Aflatoxin, selection of swine ration ingredients low in 401
Algae, accumulation of mirex by 753
Analysis, confirmation of pesticides by alkylation 47
detection and bioassay of herbicides 65
determination of DDT in sea water by scintillation counting 565
determination of glyphosate 295
GLC determiantion of paraquat 745
modification of Michael's acetylcholinesterase method 674
of naphthalenes in oil contaminated marine animals 122
of N-nitroso compounds in water 404
of volatile organochlorines in water 453
rapid determination of fuel oil in marine organisms 309
rapid determination of hexachlorobenzene 273
Animals; acute toxicity of mercury to mummichogs 534
aromatic hydrocarbons in aquatic fauna 621
beta oxidation of chlorophenoxybutyrates by guinea pigs 632
cadmium in canine tissues 457
effect of DDT,DDD & DDE on turtle ATPase 537
influence of EDTA on copper toxicity in clams 304
mercury levels in, 193
mirex residues in milk and tissues of cows 25
pesticide residues in, as affected by atmospheric levels of pesticides 760
retention of cadmium by turtle tissues 750
swine ration ingredients low in aflatoxins 401
toxicity level of hexachlorobenzene in 297
toxicity of endosulfan to rabbits 513
Arsenic in house dusts in Hawaii 449
Atrazine, confirmation by alkylation 47
Benomyl, antifungal effects against non-target soil fungi 353
Bioassay; hatching rate as a 562
oxygen depletion in static systems 149
Birds DDD poisoning and hydroxylated DDD in 385
metabolism of DDE in 657
stress as affecting cyclodiene toxicity in 250
toxicity of lead in quail 489
toxicity of methiocarb in 641
Cadmium,effect on intestinal enzymes 653
effect on protein synthesis in the rat 159
in tissues of the dog 457
retention by turtle tissues 750
Carbamates, effect on organs of mice 205
Carbaryl, acute toxicity to aquatic organisms 281
Copper and water balance in fish 221
influence of EDTA on toxicity of in clam 304
Cyclodienes, stress and toxicity to birds 250

DBCP, genetic activity of 8
DDD and hydroxylated DDD in birds 385
DDE metabolism in quail 657
DDT, catalytic dechlorination 738
determination in sea water by scintillation counting 565
effect on ATPase in turtle 537
effect on spermatogenesis in rat 171
residues in Canadian cod 505
volatilization from soils 88
Detergent toxicity to four species of fish 1
Dislogable residues, insecticides in cotton 606
Endosulfan, toxicity to rabbits 513
Enzyme, ATPase in turtle as affected by DDT,DDD,DDE 537
binding of organochlorines 43
dose dependent induction by cyclodienes 571
Enzymes, effect of cadmium on intestinal 653
effect of PCB's on lipid synthesizing 415
effected by insecticides 714
failure of hexachlorophene to alter activity of 319
induction in fish 112
in fish brain inhibited by cyclodienes 163
inhibitory effects of parathion on chloroplast 552
Ethylene oxide, sterilization with 432
Fenthion, population of animals in river water polluted by 426
Fish, cyclodiene uptake in resistant and susceptible 731
behavior of mercury in a water-fish system 699
brain enzymes inhibited by cyclodienes in 163
effect of copper on water balance in 221
effect of mirex and methoxychlor on 180
effects of ethylmercury in 409
induction of enzymes in 112
mercury levels in freshwater 193
mercury in 105
mercury in, exposed to methyl mercury 129
mercury uptake and teratogenicity in 665
organochlorines in trout from Lake Superior 480
residues of DDT in Canadian cod 505
temperature selection following exposure to DDT, PCB and phenol 545
toxicity of detergent to 1
toxicity of flame retardants to 61
toxicity of MSMA to 330
toxicity of pesticides to Bluegills 648
toxicity of S-methyl fenitrothion to 19
uptake of organophosphorous and carbamate insecticides by 346
Fuel oil, biological effects in sea water 395
rapid determination in marine organisms 309
Fumigants, genetic effects of DBCP 8
Glyphosate, determination of 295
Heavy metals, contamination in drinking water 57
elevated concentrations in a lichen 726
in beach organisms 187
in exhausted dye bath effluents 301
in a rural water supply 465

Herbicide, degradation of 2,4,5 T in soils 71
Herbicides,agar plate detection of 65
effect on macroinvertebrates by a combination of diquat and endothall 374
relative phytotoxicity of picloram derivs. 721
Hexachlorobenzene, clearance and tissue distribution in rats 313
persistence in river water in Japan 380
rapid determination 273
toxicity levels in animals 297
Hexachlorophene, distribution and biomagnification in urban drainage areas 214
failure to alter enzyme activity 319
Hydrocarbons, aromatic in aquatic fauna 621
IOMEX, acute toxicity of 241
Insecticide residues, dislogable from cotton 606
Insecticides, uptake by fish 346
Lead,contamination of soil by paint chips 289
content in trachea's from Baltimore 168
in human hair, factors affecting 579
intoxication in printing houses
toxicity in quail 489
Manganese, effect of, in rat tissues 497
gasoline additive, effect on rats 370
Mercury, acute toxicity to mummichogs 534
behavior in water-fish system 699
in fish and shellfish 105
in fish exposed to methylmercury 129
levels in otter, mink and fish 193
model non-enzymatic reduction and alkylation 32
uptake by fish and teratogenicity 665
Mercury, ethyl, in fish 409
methyl, toxicity in rats versus age 140
Methiocarb toxicity to birds 641
Methoxychlor, effects on Chlorella 617
effects on mullet 180
N-Methylcarbamates, effects of carbaryl on tumor cells 441
nitroso derivatives and mutation 389
S-Methyl fenitrothion, toxicity to fish 19
Microbiology, effect of nitrogen enrichment on halophillic bacteria 610
Mirex, accumulation in algae 753
effects on Chlorella 617
effects on mullet 180
identification of a metabolite 473
incorporation into crop seedlings 38
in milk and tissues of cows 25
movement from sediment and uptake by animals 692
phytotoxicity to germinating crop seedlings 77
residues in hen eggs and tissues 98
Molinate, acute toxicity to aquatic organisms 281
MSMA, acute toxicity to fish 330
Mutagenicity of nitroso N-methylcarbamates 389
Organochlorines, binding of to enzymes 43
in trout from Lake Superior 480
persistence in soils 520

Organophosphates, behavior in dust from soil types 49
flame retardants and toxicity to fish 61
inhibitory effect of parathion on chloroplasts 552
toxicity of enolic phosphate esters 325
Oxygen depletion in a static bioassay system 149
Paraquat, GLC determination 745
effects of human exposure to 334
Parathion, overhead irrigation and residues in grapes 209
persistence on soil surfaces and worker reentry 265
residues on fruit tree foliage 135
PCB's, biodegradation by active sludge 705
diversity of products obtained on synthesis of 361
effects on lipid synthesizing enzymes 415
effects on Spirodela sp. 558
in English rivers 687
in human blood in Tokyo 588
metabolic fate in infant primates 233
method for measuring the solubility of 13
tetrachlorodibenzofurans in 153
Phenoxyesters, beta-oxidation of butyl esters in guinea pigs 632
Picloram, relative phytotoxicity of derivatives of 721
Porphyria in rats caused by hexachlorobenzene 422
Propanil, acute toxicity to aquatic organisms 281
Soil, behavior of organophosphates in dust from 49
lead contamination by paint chips 289
persistence of organochlorines in 520
persistence of parathion on surface of 265
photochemical artifact interfering with organochlorine analysis 593
risks in adding phosphorous to forest soils 257
volatilization of DDT from 88
Tetrachlorodibenzofurans in PCB's 153
Thallium accumulation in shellfish 530
Toxaphene,acute toxicity to aquatic organisms 281
Toxicity, of detergents to four species of fish 1
of S-methyl fenitrothion to fish 19
Water, analysis of N-nitroso compounds in 404
analysis of organochlorines in 453
biological effects of fuel oil in 395
determination of DDT in, by scintillation counting 565
Fenthion pollution and animal populations 426
heavy metal content of rural 465
heavy metal contamination of 57
organochlorine residues in river 83
PCB's in English rivers 687
persistence of insect developmental inhibitors in 117
persistence of hexachlorobenzene in river in Japan 380
